Macro game-flow and role summary across the evidence sample

6 Position, Role & Game-Model Fit

Position identifies where a player starts. Role explains what the team actually needs them to do. Score the role, not the label.

6.1 Nominal Position & Observed Structure

Primary position

Secondary position(s)

Preferred side / zone

Observed formation(s)

Set-piece role

6.2 Role Profile

A player commonly carries a primary, a secondary, and a situational role at once.

Primary role

The dominant, most consistently demonstrated responsibility

Secondary role

A second responsibility performed consistently, not just occasionally

Situational role

Performed only in specific phases or match states

Functional tags — recurring outputs (e.g. line-breaker, tempo controller, width provider, box arriver, counter-press trigger, outlet, cover de

6.3 Game-Phase Responsibility

A role can change by phase of play — note the responsibility for whichever phases apply.

Build-up — demonstrated responsibility

Progression — demonstrated responsibility

Chance Creation — demonstrated responsibility

Finishing — demonstrated responsibility

Defensive Organisation — demonstrated responsibility

Pressing — demonstrated responsibility

Defensive Transition — demonstrated responsibility

Attacking Transition — demonstrated responsibility

Rest Defence — demonstrated responsibility

Set Plays — demonstrated responsibility

6.4 Target Game-Model Context

State the role inside the system it was demonstrated in.

System type observed

- ☐ Possession-dominant
- ☐ Direct
- ☐ Counter-attacking
- ☐ High press
- ☐ Low block
- ☐ Hybrid / mixed

Defensive line height

Team tempo

Best phase of play

- ☐ Build-up
- ☐ Progression
- ☐ Chance creation
- ☐ Finishing
- ☐ Defensive block
- ☐ Pressing
- ☐ Transition
- ☐ Set pieces

6.5 Role Portability

Adjacent roles this player could credibly transfer into

Role this evidence argues against (poor fit)

6.6 Demonstrated vs. Projected Role

Never present a projected role in the same terms as a demonstrated one.

Demonstrated role — what the evidence already shows repeatedly

Projected role — what this player could perform elsewhere (a hypothesis, not a fact)

Projection basis — which demonstrated behaviours support it

Projection uncertainty — what evidence is still missing

6.7 Pressure Robustness

Evidence base

- ○ Survives consistently under pressure
- ○ Effective primarily in space
- ○ Insufficient evidence to distinguish

6.8 Target-Club Role Match & Evidence Confidence

Target-club role match

- ○ Direct fit
- ○ Adaptable fit
- ○ Developmental fit
- ○ Poor fit

Evidence confidence

- ○ Verified
- ○ Strong evidence
- ○ Provisional
- ○ Early signal
- ○ Insufficient evidence

Describe the player's repeatable role behaviours in possession, out of possession and transition

7 Technical Assessment

17 Sources, Disclosures & Declaration

Primary sources, links, contacts and document references

Data limitations, unresolved contradictions or evidence gaps

Conflict of interest, financial interest, mandate limitation or relationship requiring disclosure

I confirm that this assessment reflects my professional judgement based on the evidence identified above. I have distinguished verified facts from estimates, disclosed material limitations and conflicts, and will comply with applicable FIFA, federation, safeguarding, data-protection and representation requirements.
